

**TV is not a
waste of time!**

By Shane & Ben

How children can explore places & animals.

- Children can explore places like: New York & see the statue of liberty & the empire state building. They can also see Africa.
- They can also see animals that they might not see otherwise.

Watching TV can inspire kids to try new things.

- Children might like a program so much that when they're older they would like to see what they saw on TV in real life.
- They might want to become something associated with the program.

TV can motivate kids to read books.

- When you are watching a movie or a TV series, you might like it soooooooooo much that you will probably want to read the book.
- It could also motivate them to try new things like fruit or getting more fresh air.

Thank you for listening
we hope you enjoyed it!
